

**Degree Program
International Social Work
Bachelor of Arts (BA)**

Annex 01

**Module Handbook
(March 2026)**

Study Area 5: Core Skills

Module: 01	Module Title: Scientific Work	
Module Responsibility: Prof. Dr. Heike Stammer		
Qualification Level: Bachelor	Study Semester: 1st Semester	Module Type: Mandatory Module
Course Credits: 6 ECTS Points	Total Workload: 180 h	Course Contact Time: 42 h
		Private Study Time: 138 h
Duration and Frequency: 4 SWH / every semester	Participation Requirements: none	Course Language: German
Qualification Objectives / Competencies:	<p>Graduates</p> <ul style="list-style-type: none"> • feel confident in dealing with scientific work techniques. • independently process, record, report, create written papers, organize their studies and master exams. • independently develop a scientific question and appropriately discuss and justify alternative ways of answering it. • know the rules of scientific writing and apply them safely for their own scientific text production, for the formulation of comprehensive and in-depth scientific questions, as well as for the analysis and interpretation of foreign texts. • know the basic rules for giving constructive feedback and can apply them in complex tasks and in different ways (for example in tutorials). • are familiar with the basic methods of working with the learning management system "Moodle" in order to independently follow individual paths of learning. • know the basics of epistemology, are able to present them in their own words and apply them with the help of given criteria for the analysis of scientific texts. 	
Module Contents:	<ul style="list-style-type: none"> • understand basic concepts of scientific work • obtain, evaluate and process specialized literature • listen, record, report • successfully give appropriate presentations • produce texts and seminar papers • learn how to use Word and other word processing software • learn how to handle literature management software • edit e-learning modules • understand learning and learning theories • observe and interpret • know how to handle stress and exam pressure • get to know the basics of epistemology and science • edit e-learning units • Citavi • possibilities and limitations of AI 	
Type of Course(s):	compulsory seminar	
Learning Methods:	lectures, discussion, small group work, presentations, self-reflection, feedback exercises, applied interactive exercise pedagogy, creative writing exercises, library research, e-learning units	
Requirements for the Award of Course Credits (Module Exam, Extent and Duration of Exam):	As part of the seminar, several written assignments need to be completed to prepare for seminar papers. These include literature research and journal analysis, the writing of an exposé for a seminar paper and at the end of an ungraded seminar paper. There is also a learning process-accompanying interview conducted between lecturer and student.	

Professional Applicability of Module:	Social Work, Deaconry, Religious and Parish Education
Professional Foundations (Literature):	<p>BENSBERG, Gabriele, 2013. <i>Survivalguide Schreiben: Ein Schreibcoaching fürs Studium; Bachelor-, Master- und andere Abschlussarbeiten; vom Schreibmuffel zum Schreibfan</i>. Study Area 5: Core Skills

Module: 02	Module Title: Theory and Methods of Counseling in International Social Work		
Module Responsibility: Prof. Dr. Eva Maria Lohner			
Qualification Level: Bachelor	Study Semester: 1st and 2nd Semester	Module Type: Mandatory Module	
Course Credits: 6 ECTS Points	Total Workload: 180 h	Course Contact Time: 45 h	
		Private Study Time: 135 h	
Duration and Frequency: 4 SWH / every semester	Participation Requirements: none	Course Language: German	
Qualification Objectives / Competencies:	Graduates <ul style="list-style-type: none"> • know the psychological and social-psychological theories upon which the methods of social work are based. • know common counselling approaches and their context-related application. • are able to use various communication models in practice. • reflect and control their own communication processes. 		
Module Contents:	<ul style="list-style-type: none"> • theory and counselling procedures of depth psychology, behaviorism, humanistic theory, systems theory, life-world orientation, social space orientation, subject and system orientation • communication and counselling models • conversation exercises 		
Type of Course(s):	lectures, exercises		
Learning Methods:	lectures, discussion, small group work, exercises		
Requirements for the Award of Course Credits (Module Exam, Extent and Duration of Exam):	The module finds successful completion with the academic achievement in the form of group work at the end of the 1st semester. The group presents a 15-minute video of a counselling situation with a written explanatory statement for the addressee-related choice of method as demonstrated in the video sequence.		
Professional Applicability of Module:	Social Work, International Social Work, Deaconal Sciences, Religious Education, Inclusive Education & Special Needs Education, Early Childhood Education & Care		
Professional Foundations (Literature):	STIMMER, Franz, 2016. <i>Beratung in psychosozialen Arbeitsfeldern: Grundlagen - Prinzipien - Prozess</i> . Stuttgart: Kohlhammer. WENDT, Peter-Ulrich, 2017. <i>Lehrbuch Methoden der Sozialen Arbeit</i> . 2nd ed. Weinheim: Beltz Juventa.		

Study Area 1: Fundamentals of Social Work as a Discipline and Profession

Module: 03	Module Title: Ethical and theological perspectives	
Module Responsibility: Prof. Dr. Björn Görder		
Qualification Level: Bachelor	Study Semester: 1st Semester	Module Type: Mandatory Module
Course Credits: 6 ECTS Points	Total Workload: 180 h	Course Contact Time: 45 h
		Private Study Time: 135 h
Duration and Frequency: 4 SWH / every semester	Participation Requirements: none	Course Language: German / English
Qualification Objectives / Competencies:	<p>Graduates</p> <ul style="list-style-type: none"> • know the ethical standards of ethics, especially those of International Social Work (IFWS), and can relate these to fields of professional action and concrete tasks of social work in international and intercultural contexts. • know ethical traditions and are able to classify them according to international foundations of values, religions and their cultural contexts. • have the ability and willingness to identify value-based goals and ethical dilemmas in social action in order to develop value-based, professional solutions. • have knowledge of the basics, traditions and scientific principles of ethics, especially in International Social Work. • identify and reflect on the hermeneutic or dialogical character of ethical and religious values for professional social action. 	
Module Contents:	<ul style="list-style-type: none"> • introduction to the history of ethics and traditions of ethical judgment • principles and forms of argumentation of philosophical, theological and social scientific approaches to ethics • values and norms of ethics for International Social Work. • aspects of International Social Work ethics research • professional ethical standards, fundamentals of ethics research, ethical case discussions and ethics committees as instruments of quality assurance for ethical standards of International Social Work 	
Type of Course(s):	lectures, exercises	
Learning Methods:	discussions of seminars and reflections on acquired literature, group work, lectures, presentations, case studies, exercises, excursions, everyday observations. Moodle e-learning platform with information about modules, literature, communication possibilities	
Requirements for the Award of Course Credits (Module Exam, Extent and Duration of Exam):	Students independently elaborate ethical issues related to International Social Work on the basis of scientific literature. These can be ethical traditions, values, interreligious questions or concrete challenges or conflicts of action in the professional field of International Social Work. Focus will be the presentation of and examination on an ethical issue as well as the reflection of its underlying values. Professional ethical standards and ethical requirements of International Social Work have to be dealt with. The topics are suggested by the lecturers. The choice of literature takes place under the guidance of the lecturers. Credits and nuanced grades are awarded for either a presentation or a written exam that meets these requirements.	
Professional Applicability of Module:	Social Work, International Social Work

Study Area 5: Core Skills

Module: 04	Module Title: Gender Perspectives in International Social Work	
Module Responsibility: Prof. Dr. Johanna Possinger		
Qualification Level: Bachelor	Study Semester: 1st Semester	Module Type: Mandatory Elective Module
Course Credits: 6 ECTS Points	Total Workload: 180h	Course Contact Time: 45h
		Private Study Time: 135h
Duration and Frequency: 4 SWH / every semester	Participation Requirements: none	Course Language: German / English
Qualification Objectives / Competencies:	<p>Graduates</p> <ul style="list-style-type: none"> • understand how social inequalities between men and women can be recognised from reading empirical data. • know how the determinant 'gender' shapes the social conditions of society. • understand how gender is socially produced in human interactions. • recognise the importance of gender construction for national and international social work. • recognise determinants of social inequality in various societal dimensions, are able to classify them according to social theories and formulate various options for action in science, politics and professional practice. • are familiar with different forms of empirical data representation, able to explain their meaningfulness and use them appropriately to answer research questions. • autonomously reflect on their own biographical experiences regarding the determinant "gender" within the varying socio-structural dimensions and classify them in terms of social theory. • professionally work on scientific issues concerning gender inequality in cooperation with other students, discuss them in a team, present their results in appropriate forms, and are able to guide others to appropriate reflection processes. • independently reflect phenomena of social inequality with the help of scientifically founded models, derive theoretically founded solutions for current societal challenges and operationalise them with regards to social work practice. 	
Module Contents:	<ul style="list-style-type: none"> • overview of current issues and challenges of gender research in the context of education, employment, poverty, migration, violence, social changes of family and care work • construction and deconstruction of gender in everyday life, in the family, in various fields of social work, as well as in national and international organisations and institutions 	
Type of Course(s):	lectures, mandatory elective seminar	
Learning Methods:	lectures with interactive elements, seminars with small group work and discussions	
Requirements for the Award of Course Credits (Module Exam, Extent and Duration of Exam):	seminar paper, presentation	
Professional Applicability of Module:	Social Work

Study Area 4: Reference Disciplines

Module: 23	Module Title: Spirituality and social change: Diaconal and socio-ethical requirements		
Module Responsibility: Prof. Dr. Björn Görder			
Qualification Level: Bachelor		Study Semester: 6th Semester	Module Type: Mandatory Module
Course Credits: 6 ECTS Points		Total Workload: 180 h	Course Contact Time: 45 h Private Study Time: 135 h
Duration and Frequency: 4 SWH / every semester		Participation Requirements: M 01; 03; 05; 18	Course Language: German / English
Qualification Objectives / Competencies:	<p>Graduates</p> <ul style="list-style-type: none"> • are capable to differentiate the socio-political and institutional determining factors and the underlying value tradition of social organisations in European and international comparison. • recognise and reflect specifically value-based, religious demands on professional social action even in interreligious comparison. • are familiar with the socio-political and social-ethical significance of non-statutory and public welfare services in international comparison. • are able to reflect on the historical and contemporary significance of religiously motivated social action and thus competently differentiate the resulting consequences for social action. • are capable to differentiate the socio-ethical significance of socio-political paradigm shifts of subsidiarity in an international comparison. • identify ethical and spiritual professional action objectives with regards to target groups and social forms of organisation and refer them to the sphere of activity of international Social Work. • know scientific theories about ethical demands in situational stress. They critically investigate and differentiate between injustice in social and international Social Work and its organisational conditions. 		
Module Contents:	<ul style="list-style-type: none"> • differentiate and critically reflect on the importance of spiritual and ethical values for social change, social order and intercultural contexts. • identify value-based and religious attitudes in complex and changing fields of professional action in order to reflect methodologically and independently regarding the significance for understanding their history as well as current challenges. • understand the religious and ethical contexts of free non-statutory welfare organisations as providers of social services in the social welfare state regarding their history and current significance on a scientific basis and methodically apply their knowledge to fields of professional social action. • get to know "Diakonie" (Christian Protestant social welfare) as a free non-statutory welfare association and as an ecclesiastical field of action and critically appreciate its socio-political, civic and religious significance. <ul style="list-style-type: none"> - know religious and ethical reasons for professional social action (e.g. social justice, empowerment, social advocacy), discuss them critically and independently in order to assign them both to professional action targets and to socio-political framework conditions. • are able to locate and differentiate professionally between value traditions of the modern social welfare state, civic action as well as the paradigms of the social market in European and international comparison 		
Type of Course(s):	lectures, mandatory elective seminar		
Learning Methods:	lectures with e-learning units, guest speakers and film material on historical examples of non-statutory social welfare; Moodle e-learning platform with literature and communication; seminaristic forms of learning with seminar discussions and		

	reflections on acquired literature, group work for in-depth study, short introductory lessons by lecturers and guest speakers, exercises
Requirements for the Award of Course Credits (Module Exam, Extent and Duration of Exam):	Based on scientific literature, students independently formulate a scientifically sound research question chosen from the themes of the module. The focus of the presentation lays on the written exam on ethical and spiritual attitudes and traditions, which were and are guiding social action in terms of change processes, demands and challenges of international Social Work in their history and in the present situation. The topics are provided by the lecturers. A literature selection is made available via the Moodle e-learning platform as well as literature list. Credits and nuanced grades are awarded for exams that meet these requirements.
Professional Applicability of Module:	Social Work, Deaconal Sciences, Inclusive Education & Special Needs Education.
Professional Foundations (Literature):	<p>BOEßENECKER, Karl-Heinz and Michael VILAIN, eds., 2013. <i>Spitzenverbände der Freien Wohlfahrtspflege: Eine Einführung in Organisationsstrukturen und Handlungsfelder sozialwirtschaftlicher Akteure in Deutschland</i>. 2nd rev. ed.
